**SUBJ: Follow-up on Request for Access to Well
Bridgeview II Auto Detailing, Block 69 Lot 1.14
GEO Project No. 94039T4**

Dear Mr. Pinto:

This letter is to follow-up on your meeting with Robert Shusko of GEO Engineering on August 8, 1997 and subsequent phone calls regarding the access to the above-referenced well. During the meeting, it was noted that two roll-offs would need to be relocated to gain access to the subject well on your property. You had advised us that you needed to arrange for some special equipment to move the roll-offs due to their proximity to the retaining wall along the Saddle River. Since then, we have been communicating with you regarding moving the roll-offs. Please advise us, at your earliest convenience, when this can be achieved. In order to comply with the schedule provided to the New Jersey Department of Environmental Protection (NJDEP), the surveying and measurements from the well should be completed before the end of September.

We appreciate your efforts and thank you for your assistance and cooperation in this matter. Please call us if you have any questions.

Sincerely,

GEO Engineering
